Michael Hall

Freelance Web Devleoper

Being a self taught web developer has always been a way to challenge myself and grow my critical thinking. Over the past 3 years I have found that web development can help grow yourself and the community around you. This is why I code </>

Projects

TechShirt TeeShirt Company

Ecommerce React/Nextjs, Strapi CMS, Stripe Checkout Full Stack [Project]
https://nextjs-ecommerce-frontend-three.vercel.app/

This ecommerce site is custom built using Nextjs frontend and Strapi backend. The site is features a pay feature with Stripe for an easy pay system providing full reciepts directly from Stripe. Styling choices included a mixture of SCSS and styled components. This site is equiped with a postgres database for production hosted on Horoku while the front end is hosted via Vercel.

Casey Hall Law

A peronsal injury lawyer brochure site [Website]
CaseyHallLaw.com

A brochure website built using tools such as Figma, Reactjs, Nextjs, Styled Components, and SCSS. This site features a mobile first design using CSS grid and flexbox. My role was to design, develop, and deploy all aspects of this site.

LendingHandCleaners

A website created for a residental cleaning service [Website]
LendingHandCleaners.com

A brochure website designed using Figma and developed using Nextjs. Along side of Next this site uses a mix of Styled Components and SCSS. Styling choices include css-grid for a responsive layout, with the assistance of flexbox and custom variables.
